

# Fascinations in plaster from Modellbau Luft

We are your address for good ideas

We produce handcrafted rarely and very detailed parts, model buildings and dioramas individually built to meet customer's requirements. Also, a choice of handcrafted scenes is available in very small production series. Mostly these are made from plaster, some tiny parts are made from resin and nickel silver.

Our strong goal is fit and finish, accuracy at a high level of reality; resulting in an unsurpassed originality

Our miniatures are designed to copy nature and found in related technical literature:

These are individually engraved by hand, stone by stone. That's why parts of ruins and walls have - for example - realistic mural thickness and scale sized stones.

Our specialities are:

Castles, ruins, old buildings, caves, US-Narrow-Gauge as well as dioramas.
